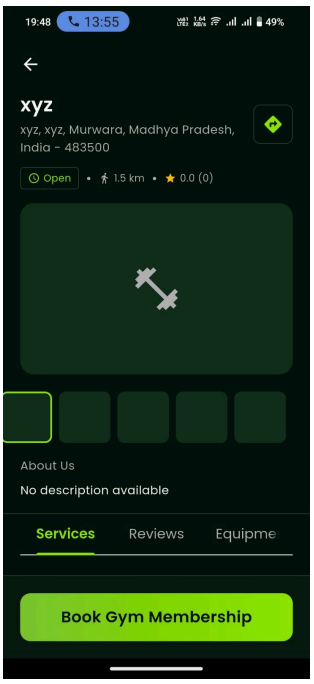
BookMyFit Bugs -

1. Images Uploaded from Vendor/Gym Panel Not Reflecting on Admin & Customer Panel

Issue Description:
While creating a gym profile in the Vendor (Gym) application, the system asks for multiple images such as display images, service images, and other related images. However, after uploading these images:

- Uploaded images are **not visible in the Admin Panel**
- Consequently, the same images are **not reflected in the Customer Application**
- Even though images are uploaded successfully from the Gym Panel, they do not appear for that particular gym in the customer view

Reference:



2. Video Upload Option Required in Display Image Section

Requirement:
Currently, there is no option to upload videos in the gym profile.

The client requires:

- A **30-second video upload option**
- The video option should be available **within the Display Image section**

3. Time Slot Bifurcation for Gym Availability

Requirement Description:
Gyms are not operational throughout the day and usually function in multiple time slots.

Required functionality:

- While creating a gym profile, the gym should be able to define **bifurcated time slots**, for example:
    - Morning Slot: 6:00 AM – 12:00 PM
    - Evening Slot: 4:00 PM – 9:00 PM
- These time slots should be selectable in the **Gym Panel**
- The same availability should be reflected across **Admin and Customer Panels**

4. Logo Update Across the Entire Application

Requirement:
The application logo needs to be updated consistently.

Details:

- A **finalized logo has already been approved**

- The same logo must be implemented across:

    - Vendor/Gym Application
    - Admin Panel
    - Customer Application

Reference:

5. KYC Documents Not Downloadable or Approvable from Admin Panel

Issue Description:
KYC documents uploaded by gyms/vendors are not functioning correctly in the Admin Panel.

Problems identified:

- Admin is **unable to download KYC documents**
- Admin is **unable to approve or reject KYC submissions**

6. Service-Specific Time Slot Visibility

Requirement Description:
Different gym services operate at different times.

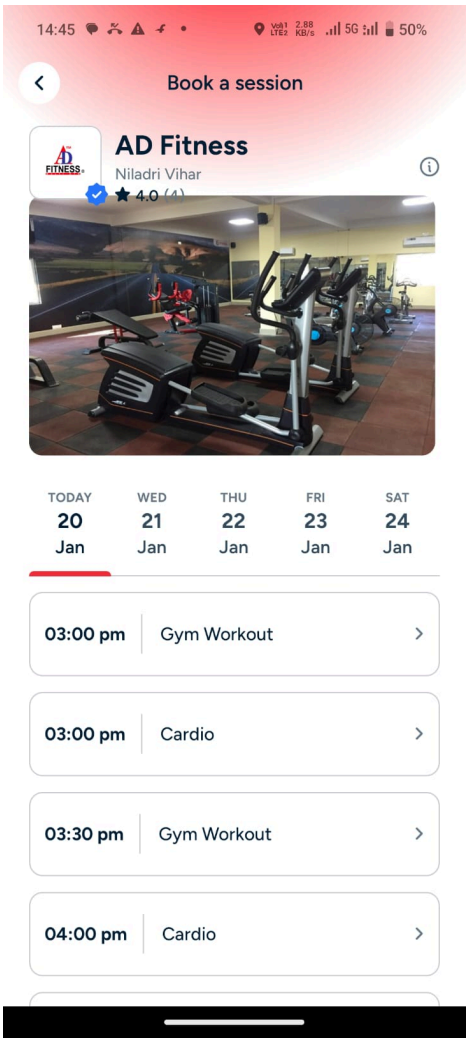
Examples:

- Gym
- Zumba
- Yoga
- Other fitness activities

Required enhancement:

- Each service should display its **specific available time slot**
- Example:
    - Zumba: 5:00 PM – 6:00 PM
    - Gym: 6:00 AM – 12:00 PM & 4:00 PM – 9:00 PM

Reference:



7. Email Field Mandatory During Gym Onboarding

Requirement:

During gym/vendor onboarding and profile creation:

- Email address should be a **mandatory field**
- Along with name and other details, the gym/vendor must provide a valid email ID

8. Membership Booking Flow Revision

Current Issue:
After clicking **"Book Membership"**, the application directly opens the **time slot selection table**, which is not the intended user journey.

Required Booking Flow:

1. User clicks **Book Membership**
2. User is redirected to **Subscription Type selection page**
3. User selects the desired subscription
4. **Order Confirmation page** is displayed
5. User completes **payment**
6. After successful payment:

    - User is redirected to **Time Slot Selection**
    - Only slots available **at least 1 hour after payment time** should be shown
      (Example: If payment is done at 3:00 PM, available slots should start from 4:00 PM onwards)

9. Subscription Duration Format Issue (Single Gym)

Issue:
On the **Customer App → Subscription Type page** for a **Single Gym**, subscription durations are currently shown as:

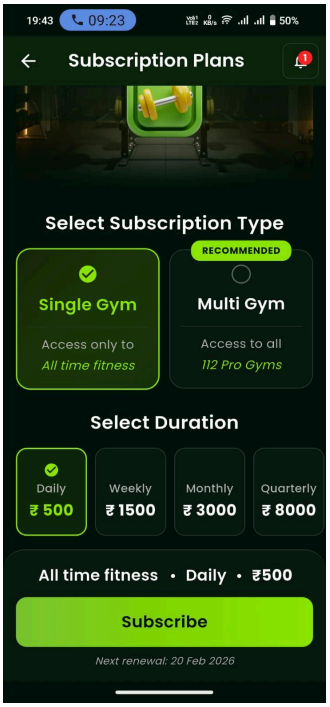
- Weekly
- Monthly
- Quarterly

Expected Behavior:
Subscription durations should be displayed in a **fixed numeric format**, such as:

- 1 Week
- 1 Month
- 6 Months

Note:

- This issue applies **only to Single Gym subscriptions**
- **Multi Gym subscriptions are working correctly** and require no changes



10. Rename “Multi Gym” to “Pro Member”

Observation:
The term *“Multi Gym”* is currently being displayed across various sections of the application.

Required Change:
Replace the term **“Multi Gym”** with **“Pro Member”** wherever applicable in the app (including plans, headings, membership categories, and related references).

Expected Outcome:
All user-facing instances should consistently reflect the updated name **“Pro Member”** to maintain branding alignment.

11. Facilities Should Vary as Per Subscription Duration (With Check Marks)

Observation:
Currently, facilities under membership plans are displayed uniformly, without variation based on duration.

Required Change:
Facilities should vary depending on the selected subscription duration:

- **1 Month Plan** → Limited facilities
- **3 Months Plan** → Moderate facilities
- **6 Months Plan** → Maximum facilities

Additionally:

- Facilities must be displayed in **bullet points with check mark icons (✔)**.
- The list should dynamically adjust based on the selected duration.
